

Ideation Phase

Define the Problem Statements

Date	30 September 2026
Team ID	SWTID-2026-5468
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Example:

I am a traveler	I'm trying to book flights on my phone	But it takes a long time	Because The website is not responsive and doesn't have a mobile version	Which makes me feel Frustrated
--------------------	---	-----------------------------	--	-----------------------------------

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
------------------------	-----------------	---------------	-----	---------	---------------------

PS-1	ServiceNow administrator / incident manager	ensure every Incident is created with complete, consistent data	users can submit High impact incidents without an Assigned To value or with a mismatched Urgency	the form only relies on manual checks instead of built-in UI validation	frustrated and worried about SLA breaches and poor reporting
PS-2	service desk agent	update incident fields quickly and correctly	State can be changed directly from the list view, bypassing form-level rules	list editing skips the checks applied on the form	concerned that records get changed without proper review
