

User Acceptance Testing (UAT) Template

Date	30 September 2026
Team ID	SWTID-2026-5468
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Project Overview:

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: Enforce data integrity on ServiceNow Incident records using a UI Policy and Client Scripts that make fields mandatory, auto-populate values, control field behaviour and prevent record submission when required conditions are not met.

Project Version: 1.0

Testing Period: 21 September 2026 to 26 September 2026

Testing Scope:

Features tested: UI Policy "High Impact Control" and its Urgency action, onChange script (auto set Urgency), onSubmit script (prevent save if Assigned To missing), onCellEdit script (prevent State change via list edit).

Requirements tested: USN-1 to USN-9 from the Project Planning Template.

Testing Environment:

URL/Location: ServiceNow instance (Incident form and Incident list)

Credentials (if required): Account with administrative or configuration access

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	UI Policy and Urgency action for High impact	Create an Incident and set Impact to High	Assignment group is mandatory and Urgency is read-only	As expected	Pass
TC-002	onChange script sets Urgency	Change Impact to High on an Incident	Urgency is set to High and an info message	As expected	Pass

			is shown		
TC-003	Mandatory enforcement (negative test)	Set Impact to High, leave Assigned To empty and click Submit	Record is not saved and an error is shown on Assigned To	As expected	Pass
TC-004	Successful save (positive test)	Fill Assigned To and click Submit	Incident is saved successfully without errors	As expected	Pass
TC-005	Reverse condition test	Change Impact from High to Medium and save	Assigned To not mandatory, Urgency editable, record saves	As expected	Pass
TC-006	List edit blocking	Double-click State in the Incident list	Alert is shown and State is unchanged	As expected	Pass
TC-007	Form-based State update	Change State on the Incident form and click Update	State change is saved successfully	As expected	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No defects were identified during UAT	Not applicable	Not applicable	Not applicable	All 7 test cases passed

Sign-off:

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
